

# Site Review Notes

Hi Kelly!

I really enjoy the addition of the buttons. The spacing/margin overall is working very nicely! I would love for this website to have some scrolling available. A couple of notes and suggestion for the final site:

- **Filmography/TV:** Having a logo/icon that animates when the user hover for each TV show would be a nice element. Next to the logo, please have a short description of which role Gordon played or the position he held during the show.
- **Restaurants:** It would be nice to see the Michelin star rated restaurant's name on the page as well as the images in a grid format. Also, having a link to the website or an address next to it would be a nice touch for the user.
- **Cooking Career:** I understand that the page isn't done yet since the text box and the image seems to be awkwardly placed. The text box and the text creates tension at the top. This page would be nice to have a gallery of images of him and cooking magazines that he featured on as well.
- **Awards:** The image and the text box is not quite aligned. It would be nice to see the awards name highlighted or some kind of motion that would make it stand out from the general text. Also, it would be nice to have a logo of the awards next to the paragraph for more visual information!

I'm excited to see the final version! Please feel free to slack me whenever you want!
